

Stewart Stevenson 1088A - MTV

£140,000

Vehicle History

Crafted to precise specifications, this vehicle was originally tailored for a specific customer by our skilled team. The interior of the body is a blank canvas, intentionally left open for a custom interior fitting, allowing the future owner to shape it according to their unique preferences.

After taking delivery, the customer chose to store the vehicle meticulously in a dry environment, where it remained untouched. However, plans have evolved, and the customer has decided to part ways with the project. As a result, the vehicle is now back with Motorcraft, presenting a remarkable opportunity for a new owner to realise their automotive aspiration.

We would like to sell this as a finished build to a customer and would happily quote on finishing this project post customer consultation.

01302 337842 ext 204

Base Vehicle Specification
